Grandpa was the soap maker for the family and others in the community. I have no idea how he made it. This is an old recipe, but I don't know whether it resembles his method. From my earliest recollection, lye could be bought at the store. I remember when mother was getting everything together for a kettle of soap, she purchased Red Devil Lye. Each can contained a picture of the devil that was absolutely adhorant to me. Anna Laura always placed the devils so they were grinning at me every time I went into the pantry.

When someone had all the necessary ingredients together, Grandpa went to make the soap. It was an all day affair.

LYE SOAP

Drip 2 gallons rainwater through approximately 5 gallons hardwood ashes. Strain through cheese cloth. To each gallon of results, add 6 pounds cleaned grease (any kind). (To clean grease from bacon and meats that have been fried, put grease in large iron kettle with 3 to 4 times as much water, rain water preferable, and heat over fire to boiling, and then cool. After cold, lift up clean grease.) After you have lye made and grease cleaned, use 1 gallon lye water, 6 pounds grease cleaned. Boil in iron pot until rather thick. Before taking off fire, add 1/2 to 1 cup borax and 1 cup ammonia. Pour into flat box or enamel dish pan. When partially set up, cut with knife.

About Potato Salad

Potato salad is best made from potatoes cooked in their jackets and peeled and marinated while still warm. Small red waxy potatoes hold their shape when sliced or diced and do not absorb an excessive amount of dressing or become mushy.

Tips for Tossed Salads

Always handle salad greens with care.

Wash well, drain and dry greens before storing; chill well before using.

To core lettuce, smack head stem end down on counter top. Then twist the core out.

It is better to tear greens into bite-sized pieces to avoid bruising with knife.

Don't cut up tomatoes for a tossed salad since their juices thin the dressing and wilt the greens. Use them only for garnishing the salad bowl.

Select only firm, hard, green cucumbers. The skin should have a slight sheen, but if it is highly polished, it is probably waxed and the skin should be removed.

Use wild greens such as dandelion, sorrel or winter cress for a different flavor and texture in tossed salads.

Soup Accompaniments

Clear Soups — crisp crackers, cheese pastry, cheese-spread toast strips.

Cream Soups — cheese popcorn, seeded crackers, pretzels, pickles and olives.

Chowders and Meat Soups — Melba toast, sour pickles, oyster crackers, bread sticks, relishes, toasted garlic bread.

VEGETABLES

How To Can Vegetables

POINTS ON PACKING

Raw pack. Pack cold raw vegetables (except corn, lima beans, and peas) tightly into container and cover with boiling water.

Hot pack. Preheat vegetables in water or steam. Cover with cooking liquid or boiling water. Cooking liquid is recommended for packing most vegetables because it may contain minerals and vitamins dissolved out of the food. Boiling water is recommended when cooking liquid is dark, gritty or strong-flavored, and when there isn't enough cooking liquid.

HOW TO CHECK CANNING JARS

The first step in home canning should take place long before food and equipment are assembled and ready to go. Jars and other supplies should be checked prior to the canning session. In that way, you can replace damaged supplies and purchase new ones to avoid costly delays or inconvenience.

Here are some tips to help you.

Choosing mason jars. Jars manufactured especially for home canning generically are called mason jars and must be used when preserving. They are designed with a specially threaded mouth for proper sealing with mason lids. So, can with standard mason jars only.

Preparing glass jars. Check all jars, rings and lids carefully. Discard any with nicks or cracks in top sealing edge and threads that may prevent airtight seals. Rings should be free of dents or rust. Select the size of closures — widemouth or regular — that fits your jar. Wash jars in hot, soapy water and rinse well. Then place in boiling water for 10-15 minutes. Keep jars in hot water until ready to use. Boil lid according to package directions.

Closing glass jars. Always wipe jar rim clean after food product is packed. Place lid on jar with button side up. Screw rings on firmly, but don't force. Do not re-tighten rings after processing or cooling.

A new lid that snaps down and clicks as the jar cools, providing visible proof of sealing, called Magic Button (R) is made by Owens-Illinois. Its red button pops up when the seal is broken. The Magic Mason jars that go with the

special lids have metric measurements as well as customary U.S. measurements molded on the side.

Jar transfer. Use jar lifter or long-handled canning tongs to transfer jars to and from canner safely. Place hot jars on rack or towel, allowing 2-inches of air space on all sides for jars to cool evenly.

PROCESSING IN A PRESSURE CANNER

Use a steam-pressure canner for processing all vegetables except tomatoes and pickled vegetables.

Directions. Follow the manufacturer's directions for the canner you are using. Here are a few pointers on the use of any steam-pressure canner:

- Put 2 or 3 inches of boiling water in the bottom of the canner; the amount of water to use depends on the size and shape of the canner.

- Set filled glass jars or tin cans on rack in canner so that steam can flow around each container. If two layers of cans or jars are put in, stagger the second layer. Use a rack between layers of glass jars.

- Fasten canner cover securely so that no steam can escape except through vent (petcock or weighted-gage opening).

- Watch until steam pours steadily from vent. Let it escape for 10 minutes or more to drive all air from the canner. Then close petcock or put on weighted gage.

- Let pressure rise to 10 pounds (240 degrees F.). The moment this pressure is reached, start counting processing time. Keep pressure constant by regulating heat under the canner. Do not lower pressure by opening petcock. Keep drafts from blowing on canner.

- When processing time is up, remove canner from heat immediately.

With glass jars, let canner stand until pressure is zero. Never try to rush the cooling by pouring cold water over the canner. When pressure registers zero, wait a minute or two, then slowly open petcock or take off weighted gage. Unfasten cover and tilt the jar side up so steam escapes away from you. Take jars from canner.

1 lb. light brown sugar	2 tsp. mace
1 lb. plain flour	1 tsp. soda
1 lb. golden raisins	1 tsp. allspice
1 lb. seeded raisins	2 tsp. cinnamon
1 lb. figs	1/2 tsp. ginger
1 lb. blanched almonds	1 tsp. nutmeg
1 lb. citron (candied)	1 c. grape juice

Assemble all ingredients. Cut cherries in half, cut up dates and figs. Use part of flour for dredging fruits and nuts. Cream butter and gradually add sugar. Add beaten eggs. (If mixture begins to separate or curdle, add a small amount of flour.) Add molasses, salt, spices and buttermilk. Add flour left from dredging. Add fruits and nuts. Add grape juice, orange, lemon juice and rind. Let mixture ripen for 24 hours. Place in loaf pans lined with wax paper (7 loaves). Steam 2 or 3 hours each and then bake in 350° oven for 15 or 20 minutes and dry out a little.

1 lb. cherries (red)	2 lb. currants
1 lb. green cherries	2 Tbsp. molasses
1 lb. pineapple (all 3 colors mixed)	1/2 lb. candied orange peel

This is the recipe that my mother made every year and I always looked forward to helping. I have carried on the tradition every year since she stopped doing it, sometimes making a double batch. it is much easier now as almonds don't have to be blanched and chopped, raisins and currants washed, flour sifted and candied fruits, diced.

1/2 c. butter
2 c. flour (all-purpose)
1 c. sugar
2 eggs

1 tsp. baking soda
1/4 tsp. salt
1 c. buttermilk

Icing:

2 1/2 c. sugar
2 oranges, juiced and grated

1 lemon, juiced and grated

Cream butter with sugar. One at a time beat in eggs. Sift together salt, soda and flour. Add dry ingredients alternately with buttermilk to cream mixture. Spray tea size muffin pans with Pam. Fill each cup slightly less than half full. Bake in preheated oven at 375° for about 12 minutes until slightly brown.

Make icing in saucepan by mixing sugar, juices and grated rinds. Cool until completely dissolved. While cupcakes are still warm, pick up with a fork and dip into hot icing. Allow cupcakes to sit on cake rack with cookie sheet under them to catch drips. If icing becomes too hard, reheat.

These may be frozen and used later. Be sure to separate them while freezing, so they do not stick together. Great for wedding receptions and other parties. Makes 60 tea size muffins.

Helpful Cooking Hints

Frozen gravies or sauces may be a little thicker after thawing than when they were freshly made. Adding a little appropriate liquid — milk, broth, bouillon or wine — will thin them to the desired consistency.

For extra juicy, extra nutritious hamburgers, add $\frac{1}{4}$ cup evaporated milk per pound of meat before shaping.

To ripen green pears, just place 2 or 3 in a brown bag, loosely closed, and store at room temperature out of direct sunlight.

In making pickles, use white vinegar to make clear pickles and coarse salt which comes in 5 pound bags. This is not rock salt. Avoid using iodized salt for pickle making. Most pickles are better if allowed to stand six weeks before using.

Lemon gelatine dissolved in 2 cups of hot apricot nectar with 1 teaspoon of grated lemon added for zip makes a perfect base for jellied fruit salad.

Put a tablespoon of butter in the water when cooking rice, dried beans, macaroni, to keep it from boiling over. Always run cold water over it when done to get the starch out. Reheat over hot water, if necessary.

Never put a cover on anything that is cooked in milk unless you want to spend hours cleaning up the stove when it boils over.

Anything that grows under the ground start off in cold water — potatoes, beets, carrots, etc. Anything that grows above ground, start off in boiling water — English peas, greens, beans, etc.

Learn where your fuse box and master cut-off switch is. If you know where the lever is to pull you can always cut the current off until a service man can come.

Canned cream soups make excellent sauces for vegetables, fish, etc. Celery with lobster, black bean or onion with cauliflower, tomato with lamb chops.

Slip your hand inside a waxed sandwich bag and you have a perfect mitt for greasing your baking pans and casserole dishes.

To reheat roast, wrap in aluminum foil and heat in a slow oven.

Hard boiled eggs will peel easily when cracked and placed in cold water immediately after taking out of the hot water.

You can cut a meringue pie cleanly by coating both sides of the knife lightly with butter.

When recipe calls for adding raw eggs to hot mixture, always begin by adding a small amount of hot mixture to the beaten eggs slowly to avoid curdling.

To remove fish odor from hands, utensils and dish cloths, use one teaspoon baking soda to quart of water.

To keep icings moist and to prevent cracking, add a pinch of baking soda to the icing.

If soup tastes very salty, a raw piece of potato placed in the pot will absorb the salt.

Pour water into mold and then drain before pouring in mixture to be chilled. Will come out of mold easier.

When rolling cookie dough, sprinkle board with powdered sugar instead of flour. Too much flour makes the dough heavy. When freezing cookies with a frosting, place them in freezer unwrapped for about 2 hours — then wrap without worrying about them sticking together.

"Little Known" HOUSEHOLD HINTS

*... that even your Grandmother
probably didn't know!*

GENERAL

- Rubbing alcohol will remove ball-point pen ink marks.
- Candles chilled for 24 hours in refrigerator will burn longer and not drip.
- Baking soda on a damp cloth will remove grime and grease from glass on oven door.
- Window cleaner will clean and polish exterior of appliances — stove, refrigerator — also small appliances, taps, etc.
- Mixture of half salt and half hot vinegar rubbed on brass will clean and polish.
- To re-smooth Teflon pans, boil for 5 to 10 minutes in the pan, a mixture of 1 cup water, 2 tablespoons baking soda, 1/2 cup liquid bleach. Wash in suds and rinse thoroughly. Then before using, wipe the surface with salad oil.
- To remove gum from hair, rub a plain chocolate bar in hair — then wash.
- A cloth wrung out of a solution of 1 tablespoon cornstarch dissolved in one quart of water, will make windows and mirrors sparkle.
- Cold tea, coffee grounds, or egg shells make a good fertilizer for house plants and act as insecticides, too.
- Try waxing your ashtrays. Ashes won't cling, odors won't linger and they can be wiped clean with a paper towel or disposable tissue. This saves daily washing.
- Stamp a few moth balls into the ground near flower beds to keep dogs away.

"Little Known"
HOUSEHOLD HINTS

- To save mess in making bread or graham cracker crumbs, place in plastic bag and roll with rolling pin.
- Add a little salad oil in when you cook macaroni or spaghetti and it will not boil over or stick.

VINEGAR

- A bowl of vinegar placed in a stuffy or smokey room will absorb tobacco smoke or the smell of paint, and keep the air fresh.

MILK

- Rinse pan with cold water before heating milk in it to prevent scorching and make cleaning easier.
- To make sour milk from sweet milk, add 1 tablespoon vinegar or lemon juice to 1 cup sweet milk.

PIES

- When baking fruit pies, cut holes in the upper crust with a thimble, place crust on pie. The holes will become larger, then place the little round circles back in place. Makes pies very decorative and serves for the steam and juice openings.
- Make your two-crust pies the night before you need them. Put in refrigerator overnight. In the morning take from refrigerator. Let pie warm to room temperature, if in glassware, so the glass won't break. Bake as usual.

- Put cream or milk on top of two-crust pies for a nice brown pie.
- Put a layer of marshmallows in the bottom of a pumpkin pie, then add the filling. You will have a nice topping as the marshmallows will come to the top.
- Cut drinking straws into short lengths and insert through slits in pie crusts to prevent juice from running over in the oven and permit steam to escape.
